STEP 1	STEP 2	STEP 3
<p>Cut, score and burnish the DSP for the outside. Remove the corner pieces and miter cut as shown above.</p>	<p>Glue the chipboard as shown in picture. Make sure to leave space as shown. Fold and adhere the outside edges over the chipboard pieces.</p> <p>Fold Ribbon in half, starting in the middle of the spine chipboard and working to outer edges adhere to chipboard.</p>	<p>Using DSP for inside, add tear and tape to all four edges. Peel back the tape (as shown in picture) about a third of the way. This helps to get the inside just right. Once you have placement, pull the tabs you created off and finish adhering to base.</p> <p>Burnish all sides and use bone folder to crease the space between spine. Glue Dollar Tree Notebook to right side of book ensuring it is lined up against spine, top and bottom and tie your ribbon in a bow.</p>
